

PRESIDENT IS CONSIDERING AMERICAN POLICY

Is Not as Apprehensive of the Result as Minor Officials

IT IS PROBABLE, HOWEVER, THAT THE NEXT NOTE WILL CONTAIN DEFINITE ANNOUNCEMENT OF AMERICAN INTENTIONS

(Associated Press)

Washington, July 14.—The first official announcement of President Wilson's plans for dealing with the situation between Germany and the United States came last night in a telegram from Cornish, N. H., to Secretary Tumulty, saying that President Wilson would return to Washington soon and lay the entire subject before his cabinet.

The message indicated that the president had not yet arrived at a decision as to the American policy. Secretary Tumulty made public the text of the telegram, which set at rest the reports that the president had already made up his mind on the German reply and that he did not view the situation as seriously as high officials at Washington.

So far as can be gathered here, the president will find his advisers practically unanimous in the belief that the crucial point in the correspondence with Germany, over submarine warfare has arrived and that the next note must convey more or less pointedly the purposes of the United States in the event of further violations of American rights in the war zone.

Washington, July 14.—The mobilization of the country's inventive genius to aid the working out of problems, as proposed by Secretary Daniels was discussed widely yesterday, by officials of both the army and navy and the selection of Thomas A. Steinmetz, one of the world's authorities in electrical engineering; Hudson Maxim, an inventor and a maker of guns and explosives; Orville Wright, an airplane expert; Alexander Graham Bell, the inventor of the telephone; Simon Lake, the submarine inventor and Dr. John Hays Hammond, Jr., a radio communication expert.

AN INNOVATION

AN INDIAN BASEBALL TEAM WILL PLAY IN OCALA

Ocala baseball fans will see something unusual Thursday, Aug. 5, when Green's Nebraska Indian baseball team comes to this city for a game with the home team.

These Indians are the real goods, both in baseball and original Americanism. Most of them have been at the Carlisle government school; they are well educated and highly civilized, and play some of the fastest baseball ever seen in the United States. They are competent to stand up again the average big league team, so our fans must not forget the date.

The Indian team is now touring Georgia. It will play a couple of games in Jacksonville during the first week in August, and by pulling the strings real hard Manager Hunter induced them to make a date for Ocala. Mr. Hunter lived for four years in Nebraska, near the reservation of the tribe, and knows what the team can do.

To show what the Indians can do, during last season, the team played 128 games. Of these they won an even hundred, lost twenty-five and tied three.

HARRY THAW A HYPNOTIST

According to the Opinion of So-Called Alienist—Case Draws Near Conclusion

New York, July 14.—The state rested late yesterday in the sanity trial of Harry K. Thaw and the case will go to the jury today. John Stanchfield, chief counsel for Thaw, announced that no new witnesses would be called for his client.

Dr. Austin Flint, an alienist testifying for the state, yesterday told the court while he was on the witness stand he thought Thaw was trying to hypnotize him. Judge Hendrick regarded the alienist with some interest and then asked if Flint really believed Thaw was trying the so-called hypnotic powers. Dr. Flint repeated his belief with great emphasis, declaring Thaw stared at him for fifteen minutes. The court's gavel was used vigorously to restore order.

Dr. Amos T. Baker, assistant superintendent of the insane asylum and Dr. Raymond F. C. Kieb, a physician at Matteawan, both testified they believed Thaw insane and that he was suffering from constitutional inferiority with a paranoiac trend.
